EDUCATION

Veermata Jijabai Technological Institute (VJTI)

B.Tech in Electronics Engineering | CGPA: 7.48

Government Polytechnic, Jalgaon

Diploma in Electronics and Telecommunication

Mumbai, India

Aug 2024 – Present

Jalgaon, India

Jun 2021 – May 2024

EXPERIENCE

AI & Product Development Intern

Aug 2025 – Feb 2026

BrainGain | [Live](#)

Remote

- Built and shipped a production assessment engine adopted by **35+ students** across **102+ tests**, featuring randomized question selection, chapter-wise filtering, and configurable difficulty distribution.
- Developed a **Python workflow** to process ICSE textbook content and generate structured MCQs using **Generative AI**, creating a question bank of **2,500+ questions** across **29 chapters** with **2,132+ questions attempted** in production.
- Designed a standardized JSON schema integrated with **Bloom's Taxonomy** and AI validation, reducing manual review effort and improving data consistency across the question bank.

OPEN SOURCE

Meshery Security Bug Report | [API Security](#), [Path Traversal](#), [Vulnerability Triage](#) | [Issue #18375](#) | [Advisory](#) Apr 2026

- Reported a high-impact (CVSS: 8.7) arbitrary file read vulnerability in Meshery server endpoints `/api/system/fileView` and `/api/system/fileDownload`, identifying unauthenticated access to user-controlled file paths and documenting affected handlers, reproduction steps, severity, and remediation guidance.

Meshery | [Bats](#), [CLI Testing](#), [QA Automation](#) | [PR #18604](#)

Apr 2026

- Resolved Meshery `mesheryctl` QA failure by aligning Bats e2e tests for `component view/search` with updated CLI output, refactoring repeated invalid-argument checks.

PROJECTS

Research Council: Multi-Agent Literature Review System

Sep 2026

[Python](#), [LangGraph](#), [Neo4j](#), [FastAPI](#), [Grok](#) | [GitHub](#)

- Built a **6-node LangGraph pipeline**: three agents (Evidence, Skeptic, Methodology) analyze a question in parallel, cross-review each other, and a Chairman agent synthesizes a final answer surfacing disagreement across **7 sequential LLM calls per query**.
- Engineered **hybrid retrieval in Neo4j** combining cosine-similarity vector search over **384-dim MiniLM embeddings**; ingested **25 arXiv papers**, validated by a **5-test pytest suite**.

DocuMind: RAG-based Document Q&A | [LangChain](#), [FastAPI](#), [FAISS](#) | [Live](#) | [GitHub](#)

Feb 2026

- Built a **full-stack document Q&A chatbot** for Swiggy's annual report using **FastAPI** and **LangChain**, extracting text via a hybrid **pdfplumber + PyMuPDF + Tesseract OCR pipeline** to handle both digital and scanned documents.
- Engineered a **retrieval pipeline** with storing TF-IDF embeddings in **FAISS** and a **dual-LLM fallback architecture** (**Gemini & Groq**), achieving **98% source-citation accuracy** at an **avg. response time of 1.02s**.

Mumbai in Stone & Concrete | [MapLibre GL](#), [OpenFreeMap](#), [Wikipedia API](#) | [Live](#) | [GitHub](#)

- Built a **3D walkthrough of 28 Mumbai landmarks** across **multiple architectural styles**, pulling real building heights from OpenStreetMap and live photos and historical context from Wikipedia as an accessible alternative to paid architecture walks.

SKILLS

- Languages:** Java, Python, HTML, CSS
- Technology / Frameworks:** FastAPI, LangChain
- AI/ML:** RAG, Transformers
- Libraries:** Scikit-learn, Pandas, NumPy
- Development Tools:** Git, Docker, Google Colab, Jupyter Notebook

ACHIEVEMENTS

- Secured **3rd place** in the **E-Cell's Startup Pitch Contest** at VJTI.
- Allianz Tech Championship 2025** finalist; among **5,000+** participants.
- Built BrainGain platform features contributing to **Rs. 1.07L+ revenue** within 2 months of launch.
- LeetCode rating **1450+**.

POSITIONS OF RESPONSIBILITY

- Led VJTI's participation at **Apogee (BITS Pilani)**
- Editor-in-Chief**, magazine section; led **20+ contributors**.
- Served as **PR Head of Debate and Literary Arts (DLA)** at VJTI.
